## Screw Cap Microcentrifuge Tubes

**Premium Quality  
Made In The USA!**

Bio Plas Screw-Cap Microcentrifuge Tubes are ideal for any sample-processing or storage application and for working with valuable or hazardous cells and materials.

The strength, safety, and reliability, of the Bio Plas Screw-Cap Microcentrifuge Tubes let you perform procedures that simply can't be done with many other tubes. Spin them, store them, transport them (even by air). Boil, irradiate them. They'll stand up to the test!

Inside the Screw Cap the O-Ring forms a secure and leak-proof seal. The Bio Plas Screw-Cap Microcentrifuge Tube's square threads won't strip and they are on the outside of the tube, so you minimize the risk of contaminating your sample or letting it contaminate the Lab Tech.

### Screw Cap Microcentrifuge Tube Features:

- **Sample Integrity:** EPDM O-Rings create a positive seal to prevent leaking during processing, storage, or transport.
- Tubes made of inert virgin, high-clarity, ultra-pure, polypropylene to minimize risk of altering samples.
- Will withstand maximum G-forces up to 20000 x g.
- **Sturdy and Reusable:** Ideal for freezer storage, boiling, autoclaving and irradiation.
- Will withstand temperature ranges of  $-196^{\circ}\text{C}$  to  $+121^{\circ}\text{C}$ .
- Free of detectable DNase, RNase, DNA, PCR inhibitors, and endotoxins.
- **Note:** not suitable for immersion in liquid nitrogen.
- Ideal for boiling applications.

**Transparent polymer lets you see  
your sample clearly.**
