

Serological Pipettes

- Sterile, individually wrapped
- Ascending & descending graduations
- Cotton plugged
- Standardized color coding
- Paper/plastic packaging

MTC Bio serological pipettes are made from virgin polystyrene in a class 100,000 cleanroom facility, under ISO 13485. Available in six volumes (1, 2, 5, 10, 25, 50mL), they are sterilized via E-beam and individually packaged in paper/plastic pouches. All sizes have vivid black, positive and negative graduations and are color coded for easy volume identification.
