Designed for the safe and convenient  
transfer of liquids.

# Globe Scientific Transfer Pipets

Globe Scientific offers the most extensive line of plastic transfer pipets for liquid handling procedures. Produced from a custom grade of low-density polyethylene (LDPE), these unbreakable one-piece pipets are used to draw and dispense liquids in controlled, reproducible drop sizes.

Plastic transfer pipets are the perfect substitute for breakable glass Pasteur pipets, which can be a danger to laboratory personnel. And, because they are completely disposable, there is never any cross-contamination which is associated with reusable rubber bulbs.

An extensive selection of capacities, lengths and tip styles are offered to accommodate different industry needs. For blood collection, Globe Scientific offers a line of blood bank pipets which feature a specially designed stem to fit into blood collection tubes. For diagnostic kits and small volume requirements, mini transfer pipets are the ideal choice. Choose fine tip pipets for research applications and for transferring liquids into small vessels such as multi-well plates. From mini to jumbo, standard to specialty, sterile and non-sterile, Globe Scientific offers a plastic transfer pipet to suit your needs.

New sizes, styles and packaging are frequently added to our line. Check the latest product offerings at: [www.globescientific.com](http://www.globescientific.com) or call our technical sales department for assistance at (201) 599-1400.
