

Ultraseal™ LITE

NEW

The Semi-Automatic Microplate Heat Sealing System

Designed to be efficient, simple to operate, and compact, the new Ultraseal™ LITE semi-automatic microplate sealer is the ideal device for low to medium throughput labs.

In Stock & Ready to Ship

Features and Benefits

- Simple slide & seal operation
- Seal up to 6 plates per minute
- Compact footprint – takes up little space on lab bench or inside a fume hood
- Designed to provide permanent or peelable seals for polypropylene, polyethylene and polystyrene microplates
- Auto-adjusting sensors for different heights (no spacers required)
- Fully compatible with ANSI/SLAS standard plates and full skirted PCR plates
- Dual voltage capability – 115 or 220 VAC eliminates the need for a power transformer

Please refer to the attached Ultraseal™ LITE brochure for additional information and specifications.

Catalog No.	Description
250-10071	Ultraseal™ LITE Adaptable Semi-Automatic Microplate Sealer
